

FCC Broadband Map

The Federal Communications Commission (FCC) has a tool, linked below, that shows what Internet Service Providers are currently listed at an address as providing service. To see if an address is unserved click on *Service Filters* followed by *All Wired*. If an Internet Service Provider does not service the address, but is listed as a provider, please perform an availability challenge. [Location Summary - Fixed | FCC National Broadband Map](#)

The screenshot displays the FCC National Broadband Map interface. The top navigation bar includes the FCC logo, the title "FCC National Broadband Map", and a "Sign In" link. Below the navigation bar, the current filters are shown: "Service: Residential", "Technology: All Wired", and "Speed: ≥ 100/20". A "Service Filters" button is circled in orange. The main map area shows a location with a "Fixed Broadband Settings" dialog box open, also circled in orange. The dialog box has tabs for "Business/Residential" and "Residential", and lists various technologies and speed options. The "All Wired" option is selected. The "Broadband Availability" section on the right shows a table of providers and their service details. The "Availability Challenge" link is circled in orange. The "Map Legend" at the bottom indicates that green dots represent "Coverage available" and red dots represent "Coverage not available".

Haywood County Planning Map

Use the planning map to determine if a location has been awarded a broadband grant [Broadband Grant Locator \(arcgis.com\)](#) . The table below displays the program information with the corresponding *legend key*.

If a location appears to be in the RDOF boundary, Spectrum has a website to sign up for updates. [Spectrum Rural Internet Availability | Get Spectrum In Your Area](#)

Tip: If all the colors displayed in the Legend Key are not visible, try zooming in or out.
